

Intro : IID classification

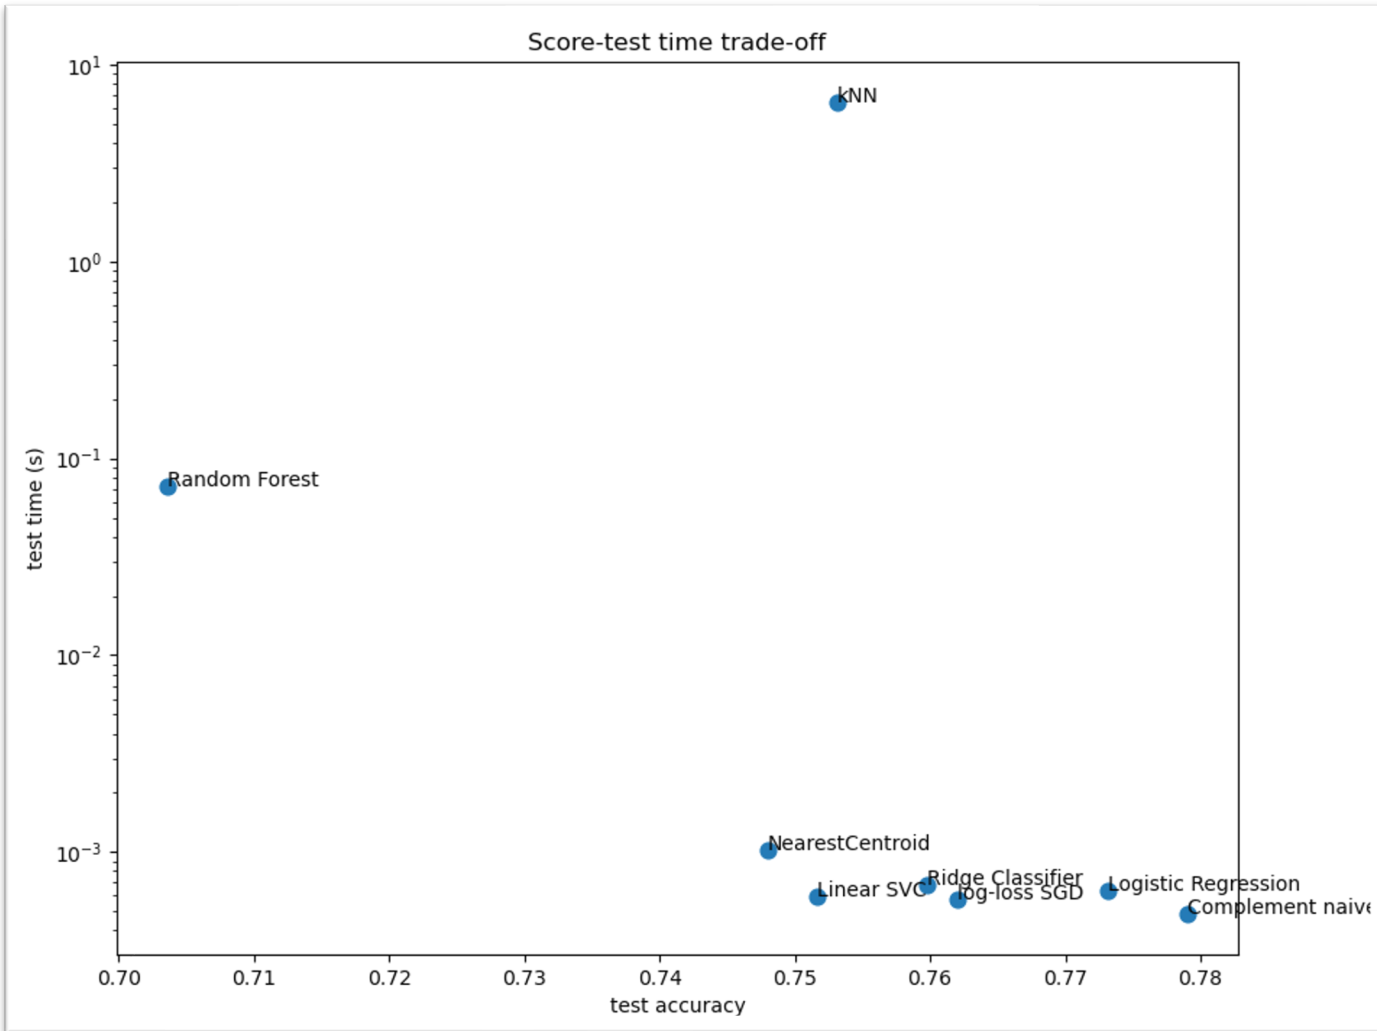

Independant data \rightarrow IID model

Intro: Text classification

Intro: text classification

Intro: time series classification

Electrocardiogram

ECG signal annotation

Heart rate: 72 bpm

Hidden Markov chain

Application: Human activity monitoring

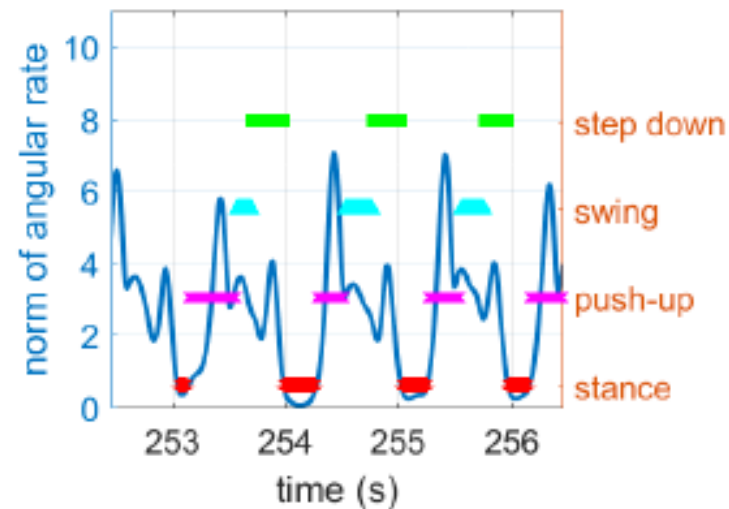

Inertial Measurement Unit

(d) Stair descent.

Gait cycle

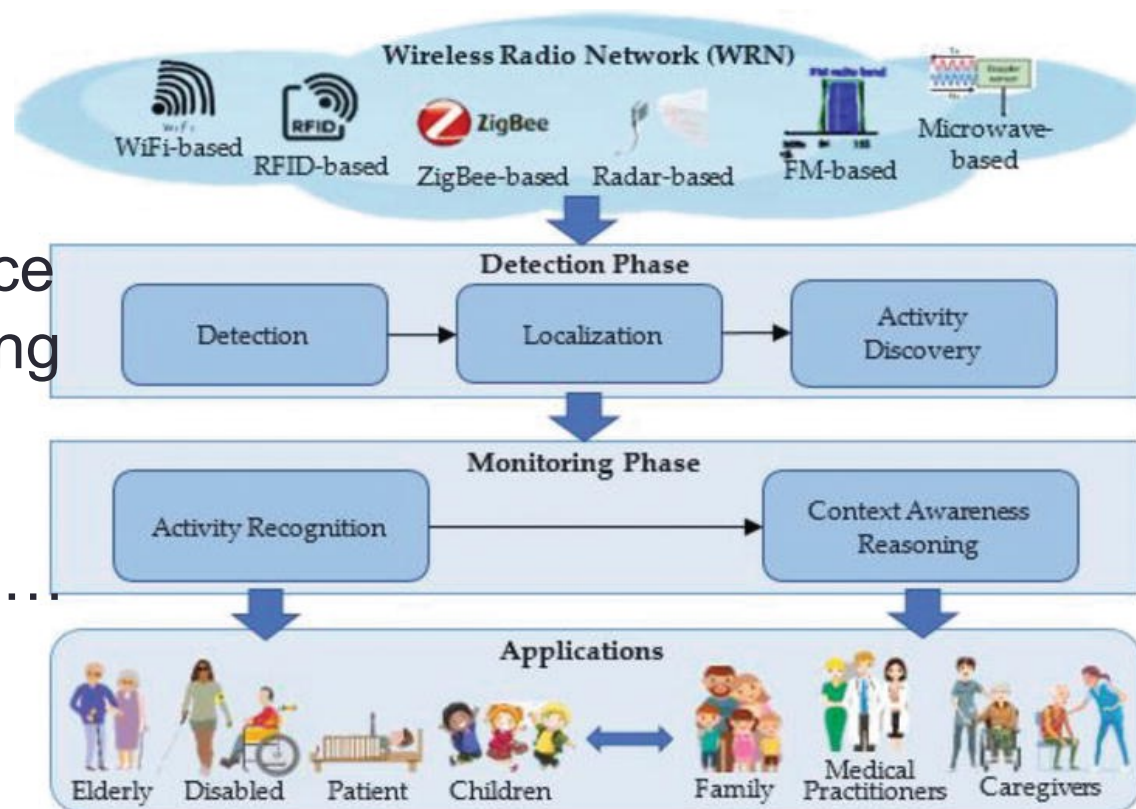

(d) Stair descent.

Application: Human activity monitoring using IoT network

Home automation / domotics.

Development of surveillance systems for the elderly using wireless beacon signal analysis, such as WIFI, Bluetooth, ZigBee sensors...

Intro: Markov chain models everywhere!

Also (from wikipedia):

- Finance and econometry (stock exchange),
- Speech coding and synthesis, handwriting recognition,
- Biology : Gene prediction, bio-sequence alignment, DNA motif recovery...

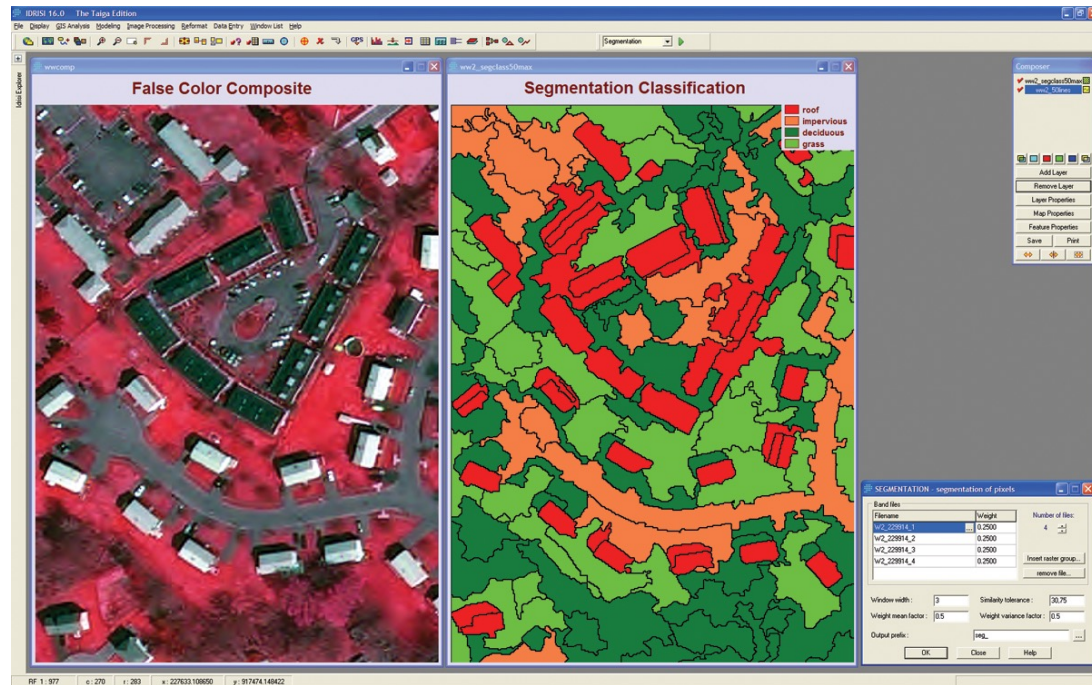

Handwritten Text Recognition (HTR), is the ability for a computer to interpret intelligible handwritten input from sources such as paper documents, photographs, touch-screens and other devices.

Intro: Image segmentation

Satellite image segmentation

Aerial photography
for Woburn, Massachusetts
in 2005.

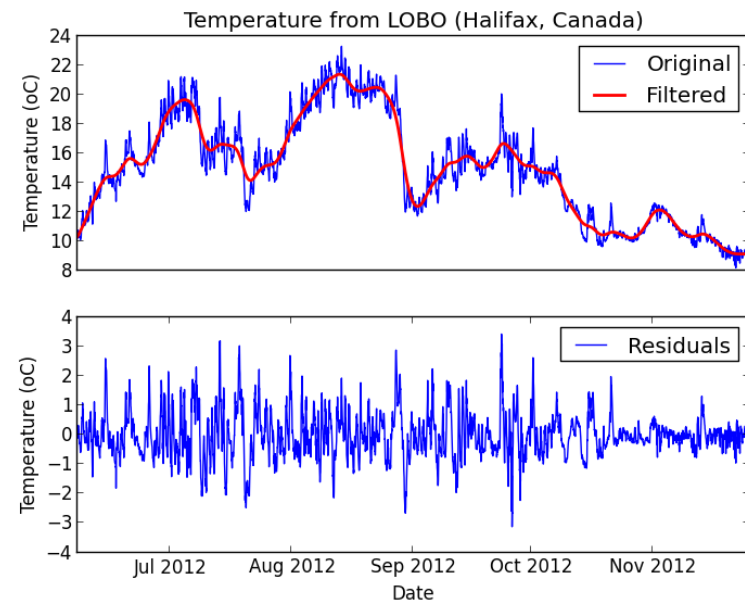

Hidden Markov Random Field Model

Intro: time series filtering

LOBO instrument (Land/Ocean Biogeochemical Observator)

Temperature data measured in the southwest edge of peninsular Halifax (Canada)

Kalman-like filtering

Lesson agenda

1. Bayesian decision (1.5h)
2. Mixture model (2h)
3. HMC model (2h)
4. Practical Work (4h) to develop an algorithm in *Python*

Slides (completed and updated periodically), exercise and lab statements collected at:
